	<b>DR. RONAK SHAH'S</b> <b>DIVINE HOMEOPATHY</b> Restoring Vitality SINCE 1991 M.D.(HOM.) 9825050054 dr-ronakshah.com	It provides effective treatment in acute, chronic & recurrent urticaria by improving immune system. Treating the disease at a deeper level and from the root.	

## URTICARIA: HOMEOPATHIC APPROACH

Urticaria are a skin disease. The main cause of urticaria is a toxin called histamine, when this toxin enters the skin, this disease affects our body. Even without or with burning on the skin of the body, red-raised, itchy circles come out. Side effects of medicines, allergies, bites of bacterial bacteria, chemicals in food items, sunlight, infected water, very cold air, etc. are the main causes. Urticaria can be caused by allergic or non-allergic factors. But a proper systemic treatment approach can provide significant relief to patients.

Urticaria can be acute, chronic, or recurrent.

- If the rash lasts for less than six weeks, it is referred to as acute Urticaria.
- If recurrent relapses appear for more than 6 weeks and can recur frequently in months or years, it is called chronic Urticaria. Chronic urticaria can affect patients' quality of life. Many of them depend on antihistamines or steroids to get some relief for a long time. In most patients, the cause of the rash is unknown.

According to our experience after treating thousands of cases at divine homeopathic clinics, homeopathy is extremely effective in treating urticaria:

- Homeopathy provides effective treatment in acute, chronic as well as recurrent urticaria by improving the underlying disrupted immune system. Hence treating the disease at a deeper level and from the root.
- Homeopathic treatment, when taken regularly, can reduce dependence on antihistamines, steroids, and other traditional treatments.
- After regular use of homeopathic medicine, hypersensitivity to allergens can be reduced over time.
- Homeopathy offers excellent treatment for urticaria with a success rate of more than 80%-85%.

Initially, chronic cases show a certain change in one to three months. The frequency, severity, and duration of episodes of urticaria gradually decrease after regular use of homeopathic medicines. The total duration of homeopathic treatment for chronic urticaria can range from eight months to more than two years. Rhus Tox, Apis Mel, Urtica Urens, Natrum Mur, etc. are some of the most common homeopathic remedies for urticaria. But it is advisable to seek homeopathic treatment under the guidance of an expert after proper evaluation of the case.
